PROFESSIONAL PROFILE

Junior Full Stack Developer with a background in Software Engineering. I have knowledge of the complete application development lifecycle. I stand out for my initiative and my ability to plan, execute, and follow up on tasks, always maintaining a problem-solving mindset. I adapt quickly to new technologies, enjoy collaborating in team environments, and seek to add value through clean, functional, and results-oriented code. I am constantly seeking to stay updated on new trends, tools, and best practices.

TECHNICAL SKILLS

Java | JavaScript | CSS3 | HTML5 | Bootstrap | Git | Github | Figma | SQL Server | MongoDB | MySQL | Joomla | Scrum | Visual Studio Code | IntelliJ | Postman | React | ClaudeCode

SOFT SKILLS

Problem Solving | Attention to Detail | Adaptability | Teamwork | Analytical Thinking | Planning and Control | Effective Communication | Continuous Learning

ACADEMIC PROJECT

Hackathon (Front-End Developer) | Generation Tennis (January 2026)

- Developed a men's and women's tennis product page to present the catalog in a structured and accessible way using HTML.
- Implemented visual design and responsive layout to enhance user experience using CSS and Bootstrap.

Learning Platform (Developer / Designer) | (January 2023 – May 2023)

- Designed and developed an educational website for managing and sharing learning content using Joomla.
- Customized templates and structured content to improve user experience and information organization using Joomla tools.

Inventory System (Developer) | SolnLove (2022)

- Designed the structure of an inventory management system to efficiently organize and control products using a logical and functional approach.
- Developed system logic to manage product entries, exits, and stock updates using Java.
- Modeled and managed the database to securely store and retrieve inventory information using SQL Server.

WORK EXPERIENCE

E-commerce Muso Gakkou (Full Stack Developer | UX/UI) | December 2025 – February 2026

- Conducted requirements analysis and designed wireframes and mockups to define application structure and user experience using Figma.
- Developed the web interface, ensuring a responsive and functional design using HTML, CSS, JavaScript, and Bootstrap.
- Implemented the backend to manage system logic and database communication using Java and Spring Boot.
- Managed version control to organize changes and support collaborative development using Git and GitHub.
- Designed and connected a relational database for efficient data management using MySQL.

IT Department | Importadora y Comercializadora COFEL | May 2024 – Present

- Recorded product entries in the system, ensuring accurate inventory updates and reliable stock control.
- Prepared invoices and billing reports, managed credit and collections through customer follow-up, and provided customer support focused on problem resolution, effective communication, and sales goal achievement.

Customer Service | Sushi Balls | November 2023 – October 2024

- Provided personalized customer service in a restaurant environment.
- Recorded orders and managed payments, ensuring efficient and high-quality service.
